TRAFFIC DELAY COMPARISON REPORT

Displays delay times, measured in seconds, during morning and evening rush, for alternate routes to the same destination for a specific time period.

TRAFFIC DELAY BY ROUTE CHART

Charts delay times, measured in seconds, for one or more routes at 5-minute intervals over a 24-hour period, for identifying peak traffic flow times by route.

TRAFFIC DELAY BY ROUTE CHART

Charts delay times, measured in seconds, for three routes at hourly intervals over a 7-day period. Makes it easy to track trends in traffic flow and provides insightful route comparisons.

FRUSTRATION INDEX DASHBOARD

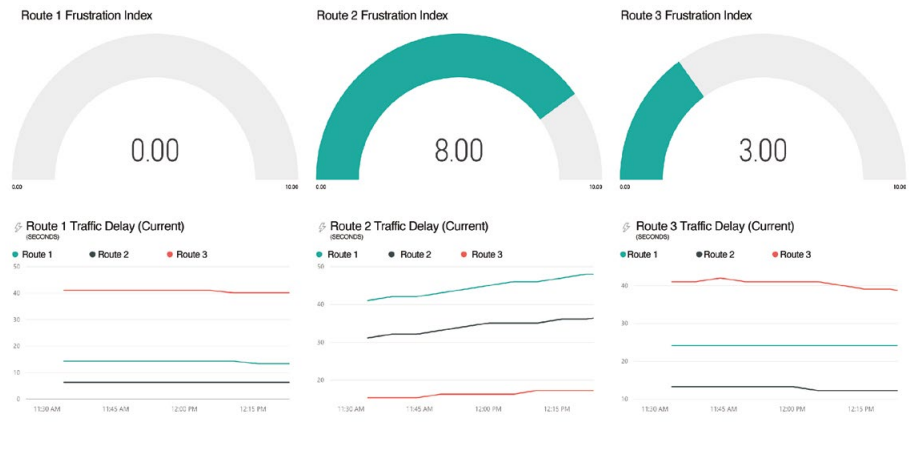

The Frustration Index (FI) is a calculation of how long a trip should take versus how long it is actually taking. This dashboard uses gauges and charts to display the FIs for alternate routes to the same destination for a specific time period.

Frustration Index Dashboard
