 - Mass update capability

TraffiCloud Web-based Management Services

- TraffiCloud provides remote sign management
- Turnkey system. Sign to web connection functional upon ship. Unit connects to TraffiCloud system automatically when sign powered
- Password-protected system with five levels of access
- Unlimited authorized users within account can have access to data
- Web-based user interface is always up to date and continually receives applicable enhancements
- Fully hosted web-based management system
 - o Any Internet-connected device and browser provide anywhere access.
 - o Device agnostic – works on any Internet-connected device with browser including PC, Mac, Android and iOS
 - o No IT involvement or support needed – System bypasses customer network, eliminating firewall issues
 - o No additional hardware or network appliances necessary
 - o No software or middleware to install for remote management
 - o Wireless cellular connection provided by ATS, no separate charges
 - o Hosted database requires no setup or maintenance by customer
- Make changes at the sign using onboard control

TraffiCloud Applications Included

Equipment management:

- o Manage equipment remotely
- o Check status and change settings/messages from any Internet-connected computer
- o Remotely accessible settings (as applicable to sign model)

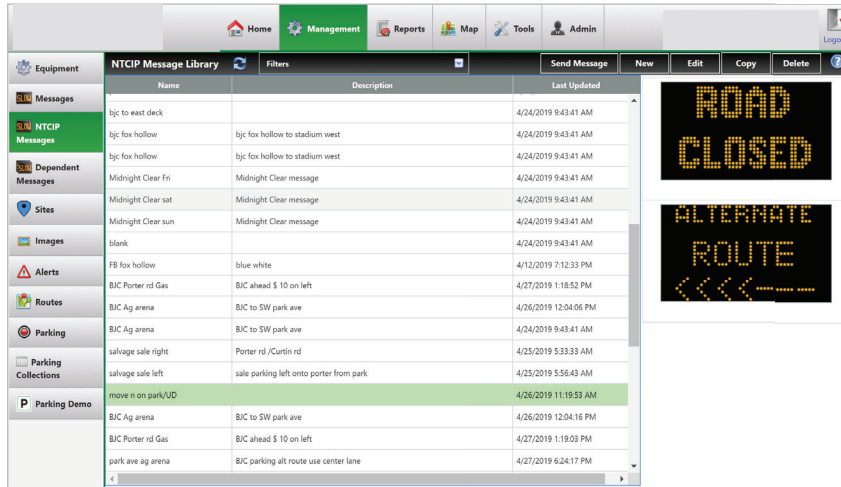

Messages Library:

- o Change messages on one or all signs remotely in real time
- o Schedule sign modes and messages with no limitations on number of windows or screens, repeat daily, weekly or set weekday/weekend schedules
- o Monitor current sign configuration and power levels
- o Monitor moves, both planned and unplanned TrafficCloud applications included in the Traffic Suite

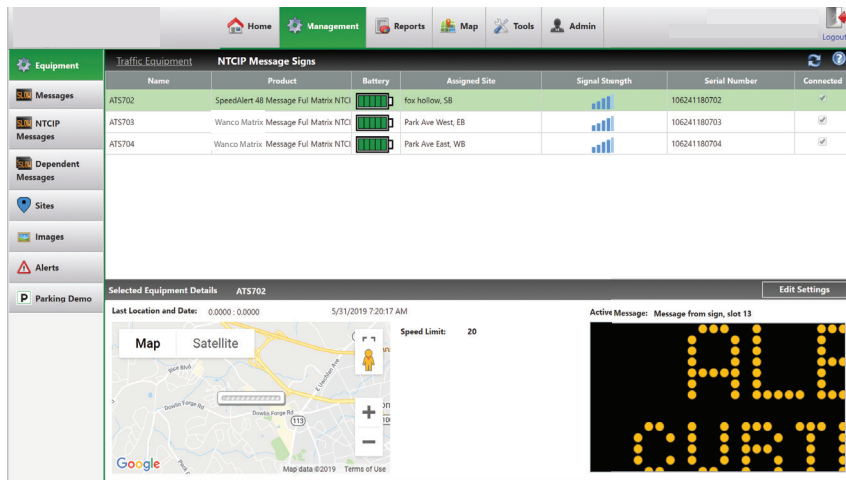

Alerts:

- o Select when and who/whom is alerted
- o Receive email and/or text message alerts for low battery

ATS TrafficCloud delivers remote management capabilities for your Wanco message signs from any Internet connection.

Check status and change messages on one or all signs simultaneously from the TrafficCloud dashboard. Save messages in the library or create new ones.

Check sign locations and battery levels without driving to each sign. Set alerts for low batteries.
