

# MULTIPURPOSE RADAR SPEED DISPLAY SIGNS

*Improve Traffic Safety with the Trusted Brand Preferred by Law Enforcement Agencies.*

All Traffic Solutions is a leader in traffic safety tools that make residential communities safer places for pedestrians, drivers, and children at play.

## SHIELD RADAR SPEED DISPLAYS

*Reduce speeding, enhance driver awareness, and gather traffic data.*

- **Quick and Easy Setup**
- **Radar Feedback** to alert drivers of their speed
- **Data Collection** for insight into traffic patterns and trends in your community
- **Violator Strobe** to warn speeding drivers to slow down
- **Remote Management** for easy sign monitoring and data access
- **Rugged Durability** so you can improve safety for years to come

“The HOA board and several owners had been looking for ways to track traffic speeds...

The community has been monitoring traffic [with Shield signs] for the past three months and the board and homeowners could not be happier.”

– Sally Wackym, Community Manager of Cassique HOA (Charleston County, SC)

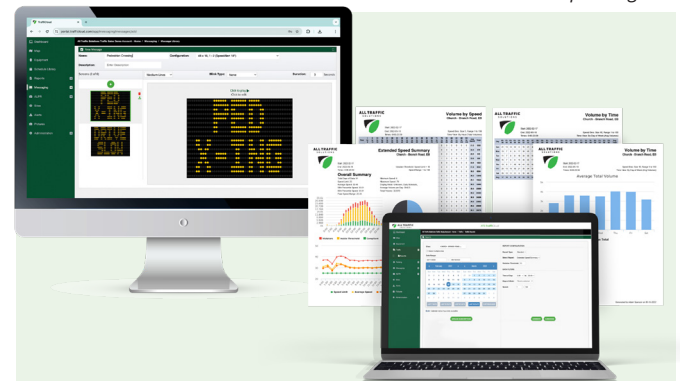

*Shield Radar Speed Sign*

## SPEEDALERT RADAR MESSAGE SIGNS

*Get even more versatility with SpeedAlert, which offers all the same standout functionalities as Shield, plus:*

- **Targeted Speed-Dependent Messaging** to influence drivers' behavior
- **Variable Messaging** to share custom information about community events, upcoming maintenance and construction, safety alerts, and more
- **Premium Red and Blue Violator Strobe** to warn speeding drivers to slow down

## TRAFFICCLOUD® REMOTE MANAGEMENT PORTAL

*Simply log into TrafficCloud® from your computer, smartphone, or tablet to:*

- **Update sign settings** and turn displays on/off
- **Update and schedule messages** to display on your signs
- **Set up email and text message alerts** for low power, excessive speeding, sign tampering, and sign location changes
- **Download ready-made traffic data reports** that show information in clear-cut charts, graphs, and tables — perfect for sharing with local law enforcement!

# FREQUENTLY ASKED QUESTIONS

## Who is All Traffic Solutions?

Since 2000, we've helped 6,000+ public and private-sector organizations improve traffic safety. We are known for providing exceptional customer service, US-based tech support, and durably constructed products.

## Are your products made in the USA?

Yes, ATS products are proudly made in the USA in compliance with the Buy America Act and the Buy American Act. Our production facility and customer support team are located in State College, Pennsylvania.

## How long do these signs last?

ATS are known to last for up to a decade or more. They are weatherproof, shatterproof, and graffiti-resistant.

## How easy are the signs to install?

Our signs are designed for easy, secure installation. One person can deploy a sign on a roadside pole, portable post, trailer, or vehicle hitch in minutes.

## How are the signs powered?

We offer two options: lithium battery power and integrated solar power. Integrated solar eliminates the need to remove batteries from the sign, and can provide continuous runtime.\*

*\*Time of year, location and sign usage can cause variation in runtime.*

## How do I retrieve the data the signs collect?

Data collected by signs with a TraffiCloud® subscription can be easily accessed anytime by logging into an online portal. Data can also be retrieved locally if desired.

## Do you offer a more low-profile tool for traffic data collection?

To collect data without influencing drivers, simply turn off the sign's display; it will still gather data. SpeedAlert signs collect data even in message mode. We also offer compact devices designed solely for traffic data collection.

Contact your ATS representative to learn more.

## Do the signs offer protection from theft and vandalism?

Yes. If a TraffiCloud-connected sign is tampered with, it captures a photo\* and sends you an alert. Signs are also equipped with GPS technology and can alert you if they unexpectedly change locations. As long as signs are powered on, they can be tracked on a map in the TraffiCloud portal.

*\*Photos captured by signs cannot serve as a substitute for license plate recognition technology.*

## What is your most budget-friendly option?

We understand that communities aim to improve traffic safety while managing limited budgets. We offer multiple cost-effective options— your ATS representative can help you find the best solution for your needs and budget requirements.

## Is there a product warranty?

With a TraffiCloud subscription, you'll receive our perpetual Premier Care warranty, covering hardware defect repairs for the full lifespan of your ATS products. Plus, enjoy 50% off accessories and other repairs.

Signs without a TraffiCloud subscription are covered under a 3-year manufacturer's warranty.
